Experience

Senior Software Engineer Feb 2023 – Present
Zscaler *Bangalore, KA*

- Developed automated sanity check packages that reduced service disruption incidents by 70% during progressive cloud rollouts by validating upgrades across staggered deployments.
- Opened 470+ high-impact bugs, proactively identifying critical vulnerabilities and misconfigurations that could affect cloud infrastructure uptime.
- Automated 1,250+ test cases (Python, Pytest, Docker) that increased regression stability by 27% and reduced test execution time by 2 hours.

Fullstack Developer Intern Oct. 2021 – Feb 2023
BQP *Bangalore, KA*

- Implemented secure user authentication using JWT tokens in Django, enabling stateless session management and scalable login systems.
- Dockerized the Django backend, streamlining local development and simplifying deployment across environments.
- Integrated Redux for global state management across components, enhancing maintainability and predictability of UI behavior.
- Developed a responsive Simulation Workspace UI using React.js and Tailwind CSS, improving user interaction and performance.

Web Developer Intern Feb 2021 – May 2021
TheKabadiwala *Bhopal, MP*

- Developed multiple modules of the Admin Portal using ASP.NET Core Razor Pages, enabling internal teams to manage revenue, users, and resource allocation.
- Built a data visualization dashboard using Blazor WebAssembly, providing stakeholders with actionable insights into company performance over time
- Translated wireframes into pixel-perfect pages for the Telecaller Portal, using HTML, CSS, and modern Bootstrap to ensure design consistency and cross browser compatibility.

Technical Skills

Languages: Python, JavaScript
Frameworks: React, Django, Pytest, Bootstrap, Tailwind.css
Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm

Projects

Pybasic | *Python, Compiler Design* June 2023

- Used Python and Compiler Design principles to create a CLI-based Interpreter that successfully parsed 100% of defined language grammar rules and executed basic programs

Spotify Group Sessions Player | *Django, React.js, MUI, Spotify API* June 2022

- Designed and implemented a room-based web app (Django/React.js) that allows concurrent control of music playback by 10+ guests, featuring real-time voting to skip/pause songs.
- Used Reactjs to create the frontend, Django (REST) for the backend, SQLite for the DB, Spotify API for the music control.

Education

Technocrats Institute of Technology Bhopal, MP
Bachelor of Technology in Information Technology *August 2019 – May 2023*
