Experience

Senior Software Engineer Feb 2023 – Present
Zscaler *Bangalore, KA*

- Built a full-stack internal portal adopted across multiple teams — React.js frontend with an in-house CSS framework, and a Python backend using Paramiko to SSH into remote VMs for orchestration, with Axios handling REST API communication between frontend and backend.
- Designed Protocol Buffers (protobuf) schemas for core product features, wrote the send/receive logic to transport this data over an internal messaging protocol, and authored the database queries powering CRUD operations on feature configuration.
- Built a Python health-check service that periodically monitored all nodes in the environment and pushed alerts to the team via a Google Chat bot, improving system visibility and reducing downtime.
- Developed a configuration-management utility that fetched configs from internal servers via SCP and version-controlled them in GitHub, ensuring traceability and fast recovery of environment state.
- Automated 1,250+ test cases (Python, Pytest, Docker), increasing regression stability by 27% and cutting execution time by 2 hours, and improved CI/CD efficiency via containerized test environments.
- Developed automated sanity-check packages that reduced service-disruption incidents by 70% during progressive cloud rollouts by validating upgrades across staggered deployments.

Fullstack Developer Intern Oct. 2021 – Feb 2023
BQP *Bangalore, KA*

- Implemented secure user authentication using JWT tokens in Django, enabling stateless session management and scalable login systems.
- Dockerized the Django backend, streamlining local development and simplifying deployment across environments.
- Integrated Redux for global state management across components, enhancing maintainability and predictability of UI behavior.
- Developed a responsive Simulation Workspace UI using React.js and Tailwind CSS, improving user interaction and performance.

Web Developer Intern Feb 2021 – May 2021
TheKabadiwala *Bhopal, MP*

- Developed multiple modules of the Admin Portal using ASP.NET Core Razor Pages, enabling internal teams to manage revenue, users, and resource allocation.
- Built a data visualization dashboard using Blazor WebAssembly, providing stakeholders with actionable insights into company performance over time
- Translated wireframes into pixel-perfect pages for the Telecaller Portal, using HTML, CSS, and modern Bootstrap to ensure design consistency and cross browser compatibility.

Technical Skills

Languages: Python, JavaScript
Frameworks: React, Django, Pytest, Bootstrap, Tailwind.css
Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm

Projects

Pybasic | *Python, Compiler Design* June 2023

- Used Python and Compiler Design principles to create a CLI-based Interpreter that successfully parsed 100% of defined language grammar rules and executed basic programs

Education

Technocrats Institute of Technology Bhopal, MP
Bachelor of Technology in Information Technology *August 2019 – May 2023*
